Pre-tax, pre-provision earnings is defined as income before taxes and provision for loan losses. We believe the most directly comparable GAAP financial measure is income before taxes. Disclosure of this measure enables you to compare our operations to those of other banking companies before consideration of taxes and provision expense. We calculate our tax-adjusted net income, return on average assets, and return on average equity, and per share amounts by using a combined effective tax rate for federal and state income taxes of 24.8% and 27.2% in the third quarter of 2021 and 2020, respectively. We acknowledge that our non-GAAP financial measures have a number of limitations. As such, you should not view these disclosures as a substitute for results determined in accordance with GAAP, and they are not necessarily comparable to non-GAAP financial measures that other banking companies use. Other banking companies may use names similar to those we use for non-GAAP financial measures we disclose, but may calculate them differently. You should understand how we and other companies each calculate their non-GAAP financial measures when making comparisons. The following reconciliation table provides a more detailed analysis of these non-GAAP financial measures:

### **About Non-GAAP Financial Measures**

This communication includes certain non-GAAP financial measures, including tax-adjusted net income, tax-adjusted earnings per share, tax-adjusted return on average assets and tax-adjusted return on average shareholders' equity. These non-GAAP financial measures and any other non-GAAP financial measures that we discuss in this presentation should not be considered in isolation, and should be considered as additions to, and not substitutes for or superior to, measures of financial performance prepared in accordance with GAAP. There are a number of limitations related to the use of these non-GAAP financial measures versus their nearest GAAP equivalents. For example, other companies may calculate non-GAAP financial measures differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of Bank7 Corp.'s non-GAAP financial measures as tools for comparison. See the table above in this communication for a reconciliation of the non-GAAP financial measures used in (or conveyed orally during) this communication to their most directly comparable GAAP financial measures.
